BANQUETTE SPECIFYING MADE SIMPLE

**Meet Made2Measure. The answer to your
banquette specifying challenges when off-the-
shelf won't cut it and millwork is too complicated.**

Where off-the-shelf meets custom.

Get the best of both worlds with a piece that's tailored to your exact specifications.

Highly flexible, our banquettes are perfect in any configuration, whether you need one to fit snugly in a corner, stretch along an entire wall or float freestanding.

With our millwork-like banquette seating system, we make it simple to specify the exact piece to fit your unique vision, without sacrificing time, budget or quality.

Choose from a pre-established kit-of-parts and a wide range of finish options to bring your design to life.

Give your next project the best seat in the house with Made2Measure by Fabricate.

Fabricate proudly collaborated with Gensler, serving as product design consultant, for Made2Measure.

Your imagination is the only limitation.

Our collection is crafted with a variety of commercial-grade materials that are manufactured to withstand the rigors of daily use.

Our frames are made from solid wood or sturdy metal, ensuring that your banquette will stand up to the daily demands of your space.

We use high-density foam in our cushions, providing both comfort and durability that will last for years.

We offer a wide range of upholstery, finish and tufting options to match your decor and brand. Whether you want to stick to a classic, neutral palette or make a bold statement with a pop of color, we've got you covered.
